

OVVO OPTICS ADDS FOUR DYNAMIC NEW STYLES TO SURGICAL STEEL & TITANIUM COLLECTION

June 9th, 2020

OVVO Optics has expanded the popular Surgical Steel & Titanium Collection with a new selection of bold, modern styles in an array of dynamic colors.

These performance-driven designs expand the collection to wearers who demand the highest level of excellence to withstand the rigors of sport and active lifestyles.

Each new frame is offered in three distinct colorways to complement the originality and personal taste of each wearer. These striking colors present a visual contrast that accentuates the frame's sporty silhouettes – elevating aesthetic characteristics with an intensity of presence.

These four new styles incorporate OVVO's patented screwless hinges as a central accent to the collection's dynamic design. These ultra-durable hinges can withstand 90 pounds of pulling force and are lab tested to withstand 300,000 rotations – comparable to 205 years of usage. In this collection, the color accented hinges bring a bold aesthetic to each style.

Available now, this addition to the Surgical Steel & Titanium Collection fuses unparalleled performance, patented technology, and dynamic design in a daring new form.
